TECHNICAL SKILLS

- HTML
- CSS

- Bootstrap
- Tailwind Css

- Git
- JavaScript
- jQuery

EXPERIENCE

Stock News Application

Languages Used : jQuery, Alpha Vantage Api, NewsApi.org Tailwind css, chart.js | [Live on github](#)

Responsible for implementing strategies for working with a multitude of 3rd party API's and DOM manipulation. Developing concepts for general goals and user story.

Todo List Application

Languages Used : jQuery and bootstrap css | [Live on github](#)

Developed application for the purpose of creating a todo list, where users are able to save and clear items on their list throughout the work day. Implemented strategies to avoid overpopulation of global memory by utilizing local storage in combination with event listeners.

Password Generator

Languages Used : Vanilla JavaScript | [Live on github](#)

Responsible for creating an application to generate a randomized password based on pre-defined criteria by the user. Implemented Fisher-Yates algorithm to ensure completely randomized search on every iteration. Developed strategies for minimal memory using conditional logic.

EDUCATION

Northwestern University
Full Stack Web Development

Gulf Coast State College
Digital Media
